

Research & Clinical Trials

Stroke Research Registry

The purpose of this registry is to connect stroke survivors with stroke related research studies occurring at the Cleveland Clinic and area hospitals. Participants will provide researchers with contact information so they may be given details about ongoing and future research studies.

To be eligible to be included in the registry, a person must be

- Over 18 years of age
- Diagnosed with a stroke
- Able to understand and provide

If you wish to participate click on the link below to sign an electronic informed consent. The consent will go over your rights as a participant and will explain the registry in more detail.
